

Breaking the Mold:

Challenging Current Paradigms in Soft Robotics

RoboSoft 2021 Workshop | April 12, 2021 | Fully Virtual Event

Overview

This is a full-day workshop with sessions spanning:

- Soft system model order reduction
- Control simplification via "mechanical intelligence"
- Propagation of curvature through a continuum
- Actuation, sensing, and control
- Manufacturing & materials innovations

Panel discussion to follow each session.

Speakers

- Dr. Carmel Majidi
- Dr. Christian Duriez
- Dr. Cosimo Della Santina
- Dr. Daniel Goldman
- Dr. Elliot Hawkes
- Dr. Eva Adnan Kanso
- Dr. Huichan Zhao

Call for Posters

Send one-page, IEEE style abstracts for poster presentations to
posters@scrambots.com by March 27, 2021.

Selected contributions will be presented in a live forum during the workshop.

Submissions will also be considered for a planned special issue journal.

More information can be found at
